

Solid, Hollow and Assembled Construction Boundary

Construction descriptions are not quality grades

OBJECT OR CLAIM Solid, hollow or assembled Apply the term to a named component, not automatically to the whole object.	AVAILABLE EVIDENCE Section, seam and documentation Use views or records appropriate to the claimed component.	POSSIBLE EVALUATION Describe construction A supported construction description can improve transparency.
ALTERNATIVE EXPLANATION Mixed construction Different components may use different routes or contain intended voids.	LIMITATION No hierarchy Construction type alone does not predict execution, durability or suitability.	RESPONSIBLE NEXT STEP Evaluate the executed object Consider geometry, joints, wear points, use and repair constraints.
